

Service Technician for installation and service of laser cutters, grinding machines and more

For our service team in Viby J, we are looking for a Service Technician for:

- Installation and maintenance of Fiber Laser Cutters and Grinding Machines: PCBs, troubleshooting, PLC coding
- Inspection and repair of orbital welding equipment (precision mechanics)
- Service inhouse and at the customers' premises
- Direct contact with Svejsehuset's suppliers and customers
- Other service related tasks

This is a full-time position, and you will be part of a team of 4 service technicians.

We provide training in the machines you need to be able to install and maintain, a good colleagues and with great opportunities for professional sparring.

As the job requires work at the customers' premises, we provide a service vehicle. As we are nationwide, there will in some cases be a need for consecutive days of accommodation "off-site" in connection with installations.

Our expectations of you

We are looking for a colleague who delivers quality on time and with a professional approach to tasks and customers. A colleague who is ready for a collaboration with active participation, varying meeting times depending on the task, and who is capable of working independently.

You are educated in automation technology, electrical engineering or similar. Experience from similar types of jobs is an advantage, but not a requirement as long as you have the desire to learn.

In addition, it is important that you are passionate about technology and mechanics and able to carry out assembly tasks.

It is a requirement that you speak and write English, and that you have a driver's license and forklift license. If you live in Central Jutland, it is an advantage.

A workplace with humor and flexibility

At Svejsehuset A/S, you will be part of a good workplace with committed colleagues. When you are not with customers you will have your daily routine in Viby J, where we - in addition to our service department - have a sales office, service department and store section, and where the Cobot company Uniwelco is also located. The company is characterized by a flat organizational structure with a high degree of flexibility.

Questions and application

As the position is to be filled as soon as possible, we process applications on an ongoing basis. Salary according to qualifications. Good pension and health scheme.

The job is applied for by sending an application and CV to Lene Børgesen on LB@svejsehuset.dk

If you have any questions about the job, you are welcome to contact:
